

Chapter 2 Affected Environment; Environmental Consequences; and Avoidance, Minimization, and/or Mitigation Measures

As part of the scoping and environmental analysis conducted for the project, the following environmental issues were considered but no adverse impacts were identified: wild and scenic rivers, coastal zone, parks and recreation areas, and timberlands. Consequently, there is no further discussion regarding these issues in this document.

All other environmental issues are addressed in this chapter.

Measures identified in this chapter represent environmental commitments included as part of the project.
