

I-80 Primary Freight Movement Corridor

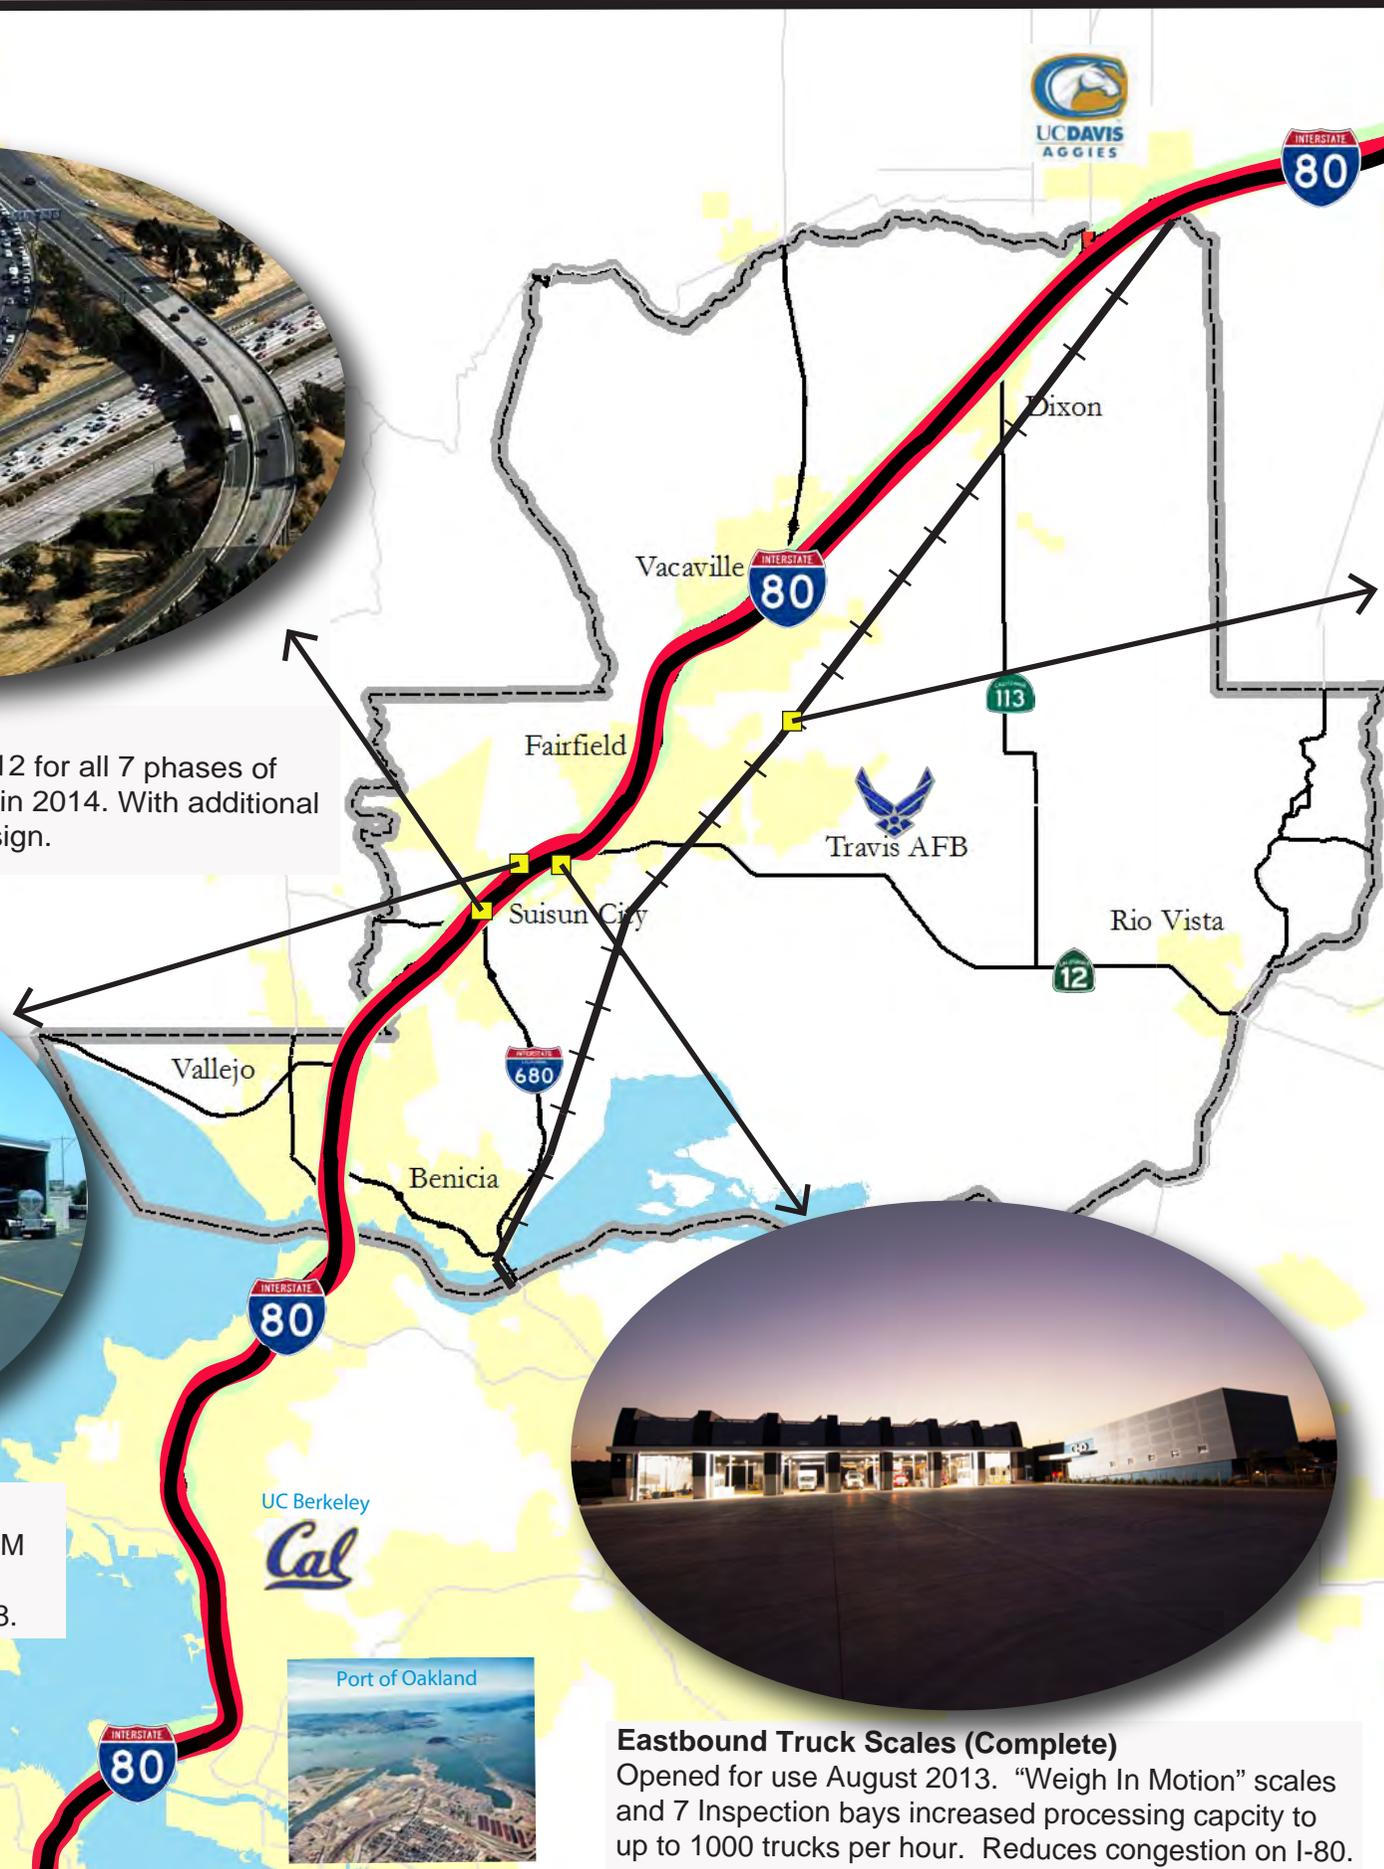

Connecting the Region and Facilitating the movement of People and Goods through Solano County.

I-80/I-680/SR 12 Interchange

FEIR/EIS completed December 2012 for all 7 phases of project. Phase I starts construction in 2014. With additional funds, Phases II & III can begin design.

Fairfield/Vacaville Train Station (Under Construction)

Track improvements such as a new grade separated crossing at Peabody Rd, upgrades to the Tolenas Industrial Park siding tracks, and a new switching station decreases delays and allows freight deliveries to be moved off the mainline. Expected completion Jan. 2017.

Westbound Truck Scales

Project Environmentally cleared. Approx. \$15M needed for design and \$130M needed for construction. Expected completion Dec. 2018.

Eastbound Truck Scales (Complete)

Opened for use August 2013. "Weigh In Motion" scales and 7 Inspection bays increased processing capacity to up to 1000 trucks per hour. Reduces congestion on I-80.
