RE: Comprehensive Transportation Plan (CTP) - Draft Tiered List of Active Transportation Projects

---

**Background:**

The Solano Transportation Authority's (STA) Comprehensive Transportation Plan (CTP) serves as the primary long-range planning document that guides and prioritizes the STA's investments in transportation. It also serves as the foundational document from which transportation projects and programs are considered for the Metropolitan Transportation Commission's (MTC) Regional Transportation Plan (RTP) called Plan Bay Area (PBA).

One of the primary purposes of the CTP is to identify a list of priority transportation projects and programs from the seven Solano cities and the County of Solano that will be eligible for STA's discretionary funds (e.g. One Bay Area Grant (OBAG), Transportation Development Act (TDA) and Bay Area Air District Transportation Fund for Clean Air (TFCA) 40% Funds Program) as well as STA staff support. The intent is to submit the list of projects and programs from the CTP Update for inclusion in the MTC's updated RTP. Doing so will make the identified Solano projects and programs eligible for current and future regional, state, and federal funding.

**Discussion:**

During Fall 2025, STA staff commenced evaluating member agency projects submitted for all three CTP elements, utilizing the Board-approved Project Prioritization Criteria to categorize projects and programs into priority tiers. These criteria are directly aligned with the Goals and Objectives recently adopted for the three CTP Elements. The CTP Update Project Prioritization Criteria can be found in Attachment A.

The first round of project evaluations focused on active transportation projects, with particular emphasis placed on the Project Readiness criterion. Projects that had completed key phases—such as environmental review and design—received higher scores in this category, whereas projects that had not yet advanced into the PA&E phase scored lower.

Following the initial scoring of the active transportation projects, STA staff used the results to organize the projects into three primary tiers. Tier I projects are actively progressing toward shovel-ready status and are expected to move into construction as soon as funding becomes available. Tier II projects have initiated key phases of development; however, substantial work remains before they can be considered shovel-ready. Tier III projects are anticipated to have a longer timeline before construction and, as a result, have not yet begun significant advancement.

The draft tiered list of active transportation projects is provided in Attachment B. The list also illustrates how each project performed under each evaluation criterion, represented using three colors: green for strong performance, yellow for lower performance, and gray for minimal or no points awarded.

The STA Technical Advisory Committee (TAC) received a presentation on this agenda item at their December 17, 2025, meeting, in which their review and feedback were requested. Feedback that was submitted by the TAC has been incorporated into the attached draft project list, as shown in Attachment B.

To continue moving this effort forward, STA staff is requesting committee members to review the draft list and take formal action at the January 14<sup>th</sup> ATC meeting by approving the draft project list. This approval will allow STA staff to proceed with a tangible project list that will continue to be refined as part of the broader CTP planning effort, which is anticipated to be completed by the end of Fiscal Year 2025–2026.

Following the January ATC meeting, a public comment period will be initiated to solicit additional input. Any comments received during this period will be considered and, as appropriate, incorporated into the refined list of projects that will be presented with the CTP Final Plan. STA staff also encourage ATC members to coordinate with their respective public works departments to review the draft tiered active transportation project list.

**Fiscal Impact:**

None.

**Recommendation:**

Approve the Draft Tiered List of Active Transportation Projects as shown in Attachment B and release them for Public Comment.
